

=====

### **Thesis -**

My intent is to show how Canada has done compared to other countries in the Olympics, I also want to show how Canada has improved or declined throughout the history of the olympics for both male and female athletes.

### **Steps to take -**

- Create Github repository
- Create a thesis and roadmap to plan out the project
- Make a mockup of the website to show where everything will go
- Use photoshop to create the design of the website
- Create the python code for the graphs and charts that will be used in the website
- Write the HTML and CSS for the website and fill the content in properly
- Push all files up to Github and merge them with the master branch
